

2011 Medical Design Excellence Awards Winners - Implant and Tissue- Replacement Products

JuggerKnot Soft Suture Anchor

The JuggerKnot is used for reattaching soft tissue to bone and soft tissue repair during arthroscopic surgery. Sports medicine surgeons can use the suture to tie tissues to bone, restoring function to the patient and mitigating associated pain. Manufactured and submitted by Biomet Sports Medicine (Warsaw, IN). Supply and design credit to PMC Smart Solutions (Shelbyville, IN).
